EXPERIENCE

Personal projects

Ecommerce product page
Stack: React, TailwindCSS.
Description: Allows the user to add items to and remove them from the cart, as well as change the large product image by clicking on small thumbnail images.

Paisaflix - Movie Page
Stack: Next, React, TailwindCSS.
Description: Project in which I was able to implement the new features of Next.js 13 such as App dir, routing, dynamic routes, server and client components.

Todo React App
Stack: React, TailwindCSS.
Description: Allows users to add new todos to the list, mark todos as complete, delete todos from the list and filter by all/active/complete.

EDUCATION

2021 - present
Self-taught on platforms such as:
FreeCodeCamp, Youtube courses, Frontend Mentor, Udemy, Future Learn (English), official documentation of each technology that I was using.

LANGUAGES

Spanish & English.
